

REPORT DESCRIPTION

- TITLE:** Variable Generation Forecast Summary
- CONFIDENTIALITY:** Public
- PURPOSE:** Publish Ontario regional energy forecast reports by fuel type for the next 48 hours, for all variable generation facilities subject to centralized forecasting.
- The following information is included in this report:
- Forecast Timestamp – Time forecast created
 - Fuel Type – Solar or Wind
 - Zone – electrical zone name;
 - Forecast Date and Hour Ending
 - Energy Forecast MW – Amount of energy expected for the hour
- Forecasts will only be published for zones that have more than two market participants operating variable generators.
- Energy Forecast MW will be blank for zones with no forecast available.
- FREQUENCY:** Published approximately 5 minutes prior to every hour.
- GRANULARITY** Hourly for the next 48 hours
- NOTES:**
- Published report is always the most current available forecast.
 - Forecast energy published may differ from data used in scheduling and dispatch operations.
 - Report products will not be displayed if the number of market participants in that category is less than 3.
